

CYFRED ODARVE

IT INFRASTRUCTURE, CLOUD, DEVOPS & DATABASE ENGINEERING LEADER

Cagayan de Oro, Philippines | cyfredodarve@gmail.com | +63 977 849 5664 | Remote

PROFESSIONAL SUMMARY

Senior IT leader and hands-on engineer with **19+ years of experience** spanning systems administration, cloud infrastructure, DevOps, database administration, software development, production operations, cybersecurity, monitoring, and technical leadership. Experienced across **AWS, Azure, GCP, Linux, Windows Server, VMware, Hyper-V, Docker, Kubernetes, CI/CD, Terraform, Ansible, MySQL, PostgreSQL, SQL Server, Redis, and modern web platforms**. Proven in operating business-critical environments, leading modernization initiatives, troubleshooting high-impact production incidents, improving reliability and security, and guiding development and infrastructure teams. Current role: **System Development and System Administration Manager**.

CORE TECHNICAL CAPABILITIES

Cloud & Infrastructure AWS EC2, RDS, S3, VPC, Route 53, ELB/ALB, WAF, IAM, CloudWatch, CloudTrail; Azure; GCP	DevOps & Automation Bitbucket Pipelines, GitHub Actions, Jenkins, GitLab CI/CD, Terraform, Ansible, Bash, Git
Containers & Orchestration Docker, Docker Compose, Kubernetes, k0s, container deployment, multi-node cluster operations, Helm, Harbor	Databases & Data MySQL 5.7/8.0, AWS RDS, PostgreSQL, SQL Server, MariaDB, Redis, backup/recovery, replication, tuning, migration
Systems & Networking Ubuntu/Linux, Windows Server, macOS support, VMware, Hyper-V, DNS, TCP/IP, VPN, firewalls, reverse proxy, load balancing	Monitoring & Observability Prometheus, Grafana, PMM, Loki, CloudWatch, metrics, dashboards, log analysis, alerting, infrastructure and database monitoring
Software & Integration Laravel/PHP, React/TypeScript, Node.js/Express, REST APIs, legacy modernization, systems integration	Analytics & AI Python, pandas, NumPy, statistics, regression, hypothesis testing, data visualization, ML fundamentals

PROFESSIONAL EXPERIENCE

System Development and System Administration Manager

Apr 2023–Present

CLIMBS Life and General Insurance Cooperative

- Lead software development, systems administration, database operations, cloud infrastructure, DevOps, security, and production support for business-critical insurance platforms while remaining hands-on technically.
- Administer AWS and hybrid infrastructure including EC2, RDS, S3, VPC, WAF, load balancing, private connectivity, monitoring, backup, and secure application access.
- Guide CI/CD and release workflows using Git-based delivery, Bitbucket Pipelines, GitHub Actions, Docker, Kubernetes, Harbor, and automated deployment practices.
- Oversee and troubleshoot large MySQL production environments, AWS RDS workloads, application integrations, Linux/Windows servers, networking, resource utilization, backup/recovery, and high-availability concerns.
- Lead architecture reviews, modernization projects, incident response, root-cause analysis, capacity planning, performance tuning, technical documentation, and mentoring across development and infrastructure teams.

Part-time Cloud Server Administrator

Jun 2023–Dec 2023

Xtendly Philippines Inc.

- Created, deployed, maintained, and monitored cloud infrastructure across AWS, Microsoft Azure, and GCP, including compute, storage, database, networking, and monitoring resources.
- Administered Linux and Windows servers; performed patching, updates, security configuration, troubleshooting, performance optimization, backup, and availability support.
- Collaborated with developers on cloud-ready architecture, CI/CD, high availability, disaster recovery, and production issue resolution.

IT Manager

Jan 2010–Mar 2023

CLIMBS Life and General Insurance Cooperative

- Directed enterprise IT strategy and operations while remaining hands-on with infrastructure, databases, software delivery, security, systems integration, and business continuity.
- Managed server and database platforms, virtualization, network services, application hosting, backups, monitoring, capacity planning, incident response, and vendor coordination.

- Led modernization and operational improvements that strengthened reliability, maintainability, deployment discipline, and alignment between engineering and business requirements.

System Developer

Apr 2007–Dec 2009

CLIMBS Life and General Insurance Cooperative

- Developed and deployed enterprise database-driven applications, designed data structures and SQL, supported production systems, and investigated application/database issues.
- Implemented testing, documentation, deployment, and support practices for operational business applications.

SELECTED TECHNICAL EXPERIENCE & PROJECTS

AWS & Enterprise Application Modernization

Support modern enterprise platforms using React, Laravel, AWS EC2, RDS, S3, WAF, load balancing, Redis, Docker, CI/CD, CloudWatch, and secure private networking. Responsibilities include infrastructure administration, deployment, database connectivity, monitoring, security, troubleshooting, and release support.

Database Administration & Performance Engineering

Administer large MySQL production environments exceeding 500 GB, with hundreds of concurrent users and high connection spikes. Perform configuration tuning, connection/memory analysis, InnoDB tuning, SQL optimization, replication, storage planning, backup/recovery, and AWS RDS migration/upgrade preparation.

Backup, Recovery & Disaster Recovery

Implemented database protection using Percona XtraBackup, binary logs, dedicated replicas, and AWS S3 off-site backup. Support point-in-time recovery, recovery validation, business continuity, and restoration planning.

Kubernetes & Container Operations

Operate multi-node Kubernetes/k0s environments and Docker workloads; troubleshoot pods, services, certificates, storage permissions, networking, resource utilization, image delivery, and application configuration issues.

Universal Monitoring System (UMS-AI)

Created and continue to develop a vendor-neutral Universal Monitoring System for servers, databases, and infrastructure. The platform uses Docker, PostgreSQL, REST APIs, Kafka event processing, Prometheus/Grafana-oriented observability, centralized health data, and AI-assisted analysis. Designed for on-premises and cloud environments with a path toward containerized/Kubernetes deployment.

Monitoring & Observability

Hands-on with Prometheus, Grafana, PMM, CloudWatch, Loki, Linux tools, and application/database logs for health monitoring, dashboarding, performance analysis, alert investigation, and production incident troubleshooting.

Security & Secure Access

Hands-on with AWS IAM, WAF, CloudTrail, security groups, S3 access controls, SSL/TLS, reverse proxies, network hardening, audit-oriented controls, and secure private access to cloud databases.

ADDITIONAL LEADERSHIP & TEACHING EXPERIENCE

Part-time Instructor

Apr 2009–Present

University of Science and Technology of Southern Philippines

- Teach Database Management, Software Engineering, Systems Integration & Architecture, Data Structures & Algorithms, Web Development, and Integrative Programming.
- Mentor students in database concepts, software engineering, systems design, integration, programming, and technical problem solving.

SELECTED ACHIEVEMENTS

- Led infrastructure modernization and migration initiatives supporting enterprise insurance applications across on-premises and cloud environments.
- Implemented and strengthened CI/CD and DevOps automation for modern application delivery using Git-based workflows, container registries, and automated deployment pipelines.
- Supported delivery and production operations for enterprise web/mobile platforms built with React, Laravel, AWS services, Redis, and containerized infrastructure.
- Designed secure remote connectivity patterns for private AWS database access without exposing database services directly to the public internet.
- Created the Universal Monitoring System (UMS-AI), a vendor-neutral monitoring and AIOps platform for servers and databases using Docker, PostgreSQL, Kafka, REST APIs, Prometheus/Grafana-oriented observability, centralized event processing, and AI-assisted analysis.
- Regularly lead complex production incident recovery across databases, Linux/Windows servers, Kubernetes, networking, certificates, storage, and application integration layers.

EDUCATION

Postgraduate Diploma, AI & Machine Learning <i>Asian Institute of Management (AIM)</i>	2025–2026
Master of Science in Information Technology <i>MSU–Iligan Institute of Technology</i>	2008–2015
Bachelor of Science in Information Technology <i>University of Science and Technology of Southern Philippines</i>	2004–2007

TRAINING & PROFESSIONAL DEVELOPMENT

DevOps & Automation Training (352 hours): Linux Administration, DevOps fundamentals, Docker, Kubernetes, CI/CD, Git/GitHub, shell scripting, networking, AWS Cloud, infrastructure practices, Terraform/Ansible concepts and automation.

Full-Stack Developer Training (138 hours): JavaScript, TypeScript, React, Node.js, Express.js, REST APIs, SQL/MySQL, Git, and software engineering.

Additional training: Ethical Hacking & Pentesting, Web Application Architecture, UI/UX with Figma, Android Application Development.

CERTIFICATION STATUS

AWS Certification – Currently in Progress

TARGET ROLE FLEXIBILITY

Well suited for senior individual-contributor, lead, or management opportunities across **Cloud Infrastructure, DevOps, Systems Administration, Database Administration, Platform Engineering, Technical Operations, Solutions Engineering, IT Infrastructure Management, and Data/Monitoring Engineering**. Open to remote/WFH opportunities and schedules aligned with international teams.
